Data Analyst | Retail and product analytics with forecasting and experimentation

SKILLS

Programming and Querying Python, R, SQL, Snowflake, dbt, Pandas, NumPy

Analytics and Statistics Exploratory Data Analysis, A/B testing, regression analysis, hypothesis testing, time series forecasting

Visualization and Reporting Tableau, Excel, PowerBI, Streamlit, Matplotlib, Mixpanel

EXPERIENCE

Data Analyst (Product focused) | Saayam for All - Non Profit Organization

Nov 2025 to Present

- Delivered MVP 1.0 of a product analytics dashboard by defining core engagement metrics and validating source data, enabling early feedback and iteration.
- Improved visibility into program performance by building dashboards that tracked engagement and outcome metrics.

Data Analyst (Graduate Assistant) | California State University Long Beach

May 2024 to May 2025

- Enabled semester over semester retention and engagement analysis by defining a metric framework across student segments and building Tableau dashboards.
- Increased survey adoption and outreach effectiveness by approximately 20% by analyzing engagement and content performance metrics and incorporating qualitative feedback into reporting.

Data Analyst (Retail Analytics) | Harman International

Aug 2021 to Jul 2023

- Enabled campaign planning and optimization by delivering sales forecasts and performance insights for retail and CPG clients using Python and ARIMA on IRI datasets.
- Reduced reporting latency by 40% by reengineering Revenue Growth Management analytics pipelines using Python and SQL.
- Improved forecast stability and interpretability by developing growth based trend forecasts across hierarchical retail categories to support planning workflows.
- Reduced manual reporting effort by 30% by designing interactive dashboards and performance reports used by six client teams.
- Identified brand reversals and portfolio risks by analyzing POS, panel, and geographic data across 250+ SKUs using regression based analysis.

Data Analyst Intern | Cognizant Technology Solutions

Feb 2021 to Jun 2021

- Improved KPI alignment and reporting clarity by analyzing business requirements and translating them into actionable dashboards.
- Reduced query execution time by over 25% by redesigning SQL schemas and optimizing data access patterns.
- Ensured analytics reliability by validating API data accuracy and performance using Postman.

PROJECTS

Air Quality Forecasting and Analytics | Python, Prophet, Streamlit [Demo](#)

- Enabled trend analysis and scenario exploration by building an AQI forecasting dashboard with interactive visualizations for non technical users.

A/B Testing Automation and Analytics | Python [Demo](#)

- Improved experimentation efficiency by automating A/B test analysis and reporting to support conversion focused decision making.

EDUCATION

California State University Long Beach | Master of Science in Information Systems

Aug 2023 to May 2025

Outstanding Scholar in Business, GPA 4.0

Certifications Google Advanced Data Analytics Professional Certificate, Google Digital Marketing and E-commerce Professional Certificate
