PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience delivering **automated analytics**, **business intelligence**, and **forecasting solutions** that drive business decisions. Proven track record processing **10M+ records**, reducing reporting time by **40%**, and generating **\$2M+ in optimization value** through **predictive models** and **A/B testing frameworks**. Expert in **SQL, Python, Tableau**, and **cloud platforms** (Azure, AWS, Databricks) with strong **stakeholder communication** skills across technical and executive audiences.

CORE COMPETENCIES

Business Intelligence & Reporting | **Predictive Analytics & Forecasting** | **A/B Testing & Experimentation**
Dashboard Development | **ETL Pipeline Design** | **Statistical Analysis** | **Stakeholder Communication**
Data Quality & Validation | **Process Automation** | **Campaign Performance Analysis**

KEY ACHIEVEMENTS

- Processed **10M+** POS records to deliver demand forecasting models that reduced stockouts and improved inventory efficiency across **10+** markets, contributing **\$2M+** in optimization value
- Designed A/B testing frameworks with statistical validation that measured campaign lift and guided marketing strategy, delivering **\$400K+** in measured revenue impact
- Built automated dashboards for **10+** stakeholders that cut reporting time by **40%** and improved KPI visibility for executive decision-making
- Automated data validation workflows that reduced manual review by **70%** while maintaining **99%** data availability SLA
- Migrated legacy reporting to PySpark/Python pipelines, cutting processing time by **30%** and enabling near real-time insights

EXPERIENCE

Analytics Engineer II | Harman International *Client Circana/IRI* Aug 2021 – Jul 2023

- Processed **10M+** POS rows across **250+** SKUs to produce consumer and retail insights, improving campaign tracking by **20%** with **\$400K+** measured revenue impact
- Developed production forecasts with **ARIMA** and feature engineering across **10+** regions using **R**, reducing error by **15%**, contributing **\$2M+** in inventory and promotion optimization gains
- Migrated reporting to **PySpark** and **Python**, cutting processing time by **30%** and allowing near real-time insights for sales and marketing partners
- Designed revenue growth reporting models using **Python, PySpark and Azure**, streamlining validation steps and improving turnaround time for pricing and promotion analysis
- Designed a Hispanic Consumer Insights model that identified the **top 5** product attributes driving sales, validated through controlled experiments and **lift analysis**, showing **8% incremental lift** in targeted markets
- Followed Agile and Six Sigma practices to design and validate analytics workflows, ensuring accuracy and reproducibility

Product Analyst Intern | Cognizant Technology Solutions Feb 2021 – Jun 2021

- Ran requirements sessions across **5** teams and translated needs into analytics specs and KPI views
- Improved SQL schema and indexing and raised query speed by **25%** for **100+** daily users
- Automated API and data checks with Python tests that reached **99.5%** validation accuracy

Graduate Assistant - Data Analytics | California State University Long Beach Sep 2024 – May 2025

- Built retention and accreditation dashboards analyzing **5,000+** student records in **Tableau**, reducing report generation time by **30%**
- Prototyped Gen AI text analysis with **Gemini** and **Sentence-BERT** on **500+** open responses to surface themes and sentiment, improving qualitative data processing efficiency
- Developed automated reporting workflows that improved data accessibility for academic stakeholders

Operations & Analytics Lead (Volunteer) | Bright Mind Enrichment Aug 2025 – Present

- Led cross-functional team of **30+** volunteers to redesign compliance workflows, implementing automated document tracking systems
- Launched internal analytics dashboards tracking program outcomes and operational KPIs, reducing reporting delays by **40%** and enabling data-driven decision making
- Built volunteer engagement dashboards monitoring onboarding completion, participation rates, and retention metrics across **30+** active contributors

PROJECTS

Retail A/B testing and campaign analysis XGBoost and statistical validation [Live Demo](#)

Automated experiment validation using XGBoost with executive-ready summaries

Air quality insights and forecasts Prophet and Streamlit [Live Demo](#)

Time-series dashboard that processes **50K+** rows and delivers forecasts near **5%** MAPE with clear decision views

DocChat RAG Chatbot for Document Q&A LangChain, OpenAI, ChromaDB, Streamlit [GitHub](#)

Built an **LLM-powered chatbot** that retrieves and summarizes information from uploaded documents using **retrieval-augmented generation (RAG)**, reducing manual search effort by **60%**

Free-Trial Email Tracker Agent LangChain, Gmail API, Python [GitHub](#)

Built an **AI agent** that scans inbox data to detect and track free trial subscriptions, automating alerts and reducing manual monitoring effort by **70%**

TECHNICAL SKILLS

Languages & Analysis SQL, Python, R, PySpark | Pandas, Scikit-learn, XGBoost, Statsmodels

Business Intelligence Tableau, Power BI, Streamlit, Alteryx, Qlik | Executive Reporting & Storytelling

Data Platforms Databricks, Snowflake, Azure, AWS (S3, SageMaker), MongoDB, Airflow

Methodologies A/B Testing, Time Series Forecasting, Statistical Modeling, ETL Design, Agile/Scrum

Tools & Workflow Jupyter, Git, Jira, Confluence, ServiceNow

EDUCATION

California State University Long Beach | MS Information Systems | GPA 4.0

May 2025

Outstanding Scholar in Business award and focus in applied analytics and quantitative methods
